

EDET SIMON (ALPHAA)

AI & BUSINESS INTELLIGENCE DEVELOPER

Python • AI • Business Intelligence • Data Analytics

Portfolio: <https://edetsimon.github.io/Alphaa-Portfolio/>

PROFESSIONAL SUMMARY

AI & Business Intelligence Developer with 3+ years of experience building intelligent software, business intelligence solutions and analytics platforms using Python, Flask, SQL, Power BI and Large Language Models. Designed and deployed AI-powered applications including Nova AI Analyst Web, Nova AI Analyst Telegram Bot and Nova AI Studio. Passionate about transforming raw data into executive-ready insights through automation, dashboards and AI.

CORE EXPERTISE

- **Artificial Intelligence:** LLMs, Groq API, Ollama, Prompt Engineering, AI Automation
- **Programming:** Python, Flask, Pandas, Plotly, ReportLab, Tkinter
- **Business Intelligence:** SQL Server, Power BI, Excel, DAX, Dashboard Design
- **Web:** HTML, CSS, JavaScript, GitHub, Railway Deployment

FLAGSHIP PROJECTS

- **Nova AI Analyst Web**
Developed and deployed an AI-powered BI web platform with CSV/Excel upload, executive AI insights, Plotly dashboards and Railway deployment.
- **Nova AI Analyst Telegram Bot**
Built an AI assistant that analyzes datasets and generates executive PDF reports.
- **Nova AI Studio**
Created a modular desktop AI assistant with persistent memory and CSV analytics.
- **Railway Tickets BI Dashboard**
SQL Server + Power BI dashboard for revenue, delay and route analysis.
- **Adidas Sales Dashboard**
Executive Power BI dashboard for product, retailer and sales insights.
- **Python Currency Converter**
Desktop application with live exchange-rate integration.
- **Python Weather App**
Real-time weather desktop application using APIs.
